

DESCRIPTION

High-pressure acrylic paint in a spray can, the ultimate choice for graffiti artists. It is well-suited for covering large surfaces quickly, thanks to the advanced propellant gases it incorporates. With this technology, you can achieve incredibly fast application, as it dries in just 5 minutes (to the touch). Perfect for various weather conditions, it's ideal for creating graffiti art, designs, models, and mock-ups.

Shake it well before use and spray from a distance of 8-10cm. For the best results, apply two layers, waiting 3-5 minutes between each coat. **Best application temperature: 10°C - 25°C.**

AFTER USE

To clean the valve, turn the container upside down and spray until pure gas comes out.
